Reshaping the world of finance

Global Sustainable Finance Network (GSFN) is a voluntary membership-based global initiative launched in 2011 under the auspices of the World Federation of Development Financing Institutions (WFDFI)¹ by the European Organisation for Sustainable Development (EOSD)² and the Association of Development Financing Institutions in Asia & the Pacific (ADFIAP)³.

We envision a thriving, preeminent global community of financial institutions and other stakeholders working together for projects, programs and activities that are socially beneficial, environmentally responsible and economically viable.

To promote sustainable finance through initiatives that provide growth opportunities to members, enhance their capacities, foster innovation and bring together stakeholders to promote a model financial industry that is based on sustainable practices.

The GSFN has been established to:

- ◆ Provide a common platform that helps its member financial institutions benefit from opportunities emerging through transformation to sustainable economy;
- ◆ Support its members in developing capacities to integrate sustainability across the board;
- ◆ Foster initiatives that help build public-private partnerships promoting sustainable lending and investments;
- ◆ Offer networking opportunities to member financial institutions, multilateral organizations, government bodies, business and industry and other stakeholders for sharing experiences and ideas;
- ◆ Provide a forum to support the development and execution of sustainable finance policies and practices;
- ◆ Present a marketplace for members to promote their sustainable finance expertise, business ideas, products and services and to search for partners to develop and execute programs, projects and activities; and
- ◆ Perform any other task that promotes sustainable finance.

¹WFDFI is the global focal point for institutions providing and promoting sustainable development finance. It has 328 member-institutions in 154 countries and territories around the world. ²EOSD is a specialized organisation for developing and executing sustainability strategies, projects, programs and initiatives that contribute in implementing the EU strategy for sustainable development. ³ADFIAP is the focal point of all development banks and other financial institutions engaged in the financing of sustainable development in the Asia-Pacific region. It has 131 member-institutions in 45 countries.
